# Geometric Table

Designer: Alain Gilles

Summing up significant stylistic and material research, Geometric Table is a transforming shape-shifting table that plays on perspective: with a hypnotic visual effect, it looks different depending on the point of view, for a living area with a surprising personality. The concept is based on chameleon-like silhouettes, starting with the base: its drop-shaped four legs appear either thick or sharp and thin, playing together to offer a different perception of their visual weight as you walk around the table, with an impressive scenic yet slender and

graceful presence, given by its rounded shapes. The table is also available in three precious material finishes: a special clay hand finished spatula effect which gives the entire frame a sculptural look; Geometric Table Wood, where ebony is used to make both the top and the legs, as if the table were carved from a single block of wood; and last but not least Geometric Table with full marble top and legs. Geometric Table is also available in a four-meter long version, Geometric 400, a size designed specifically for offices and hospitality.
